Before You Start

- § FD68 is the easiest burner to service
- § Oil nozzle removal is a 5 minute operation!
- § No need to disconnect any external cables, piping or linkage
- § Required tools: one wrench

1). Open Door Latch

2). Open Swing Cylinder

3). Disconnect Oil and Atomizing Air

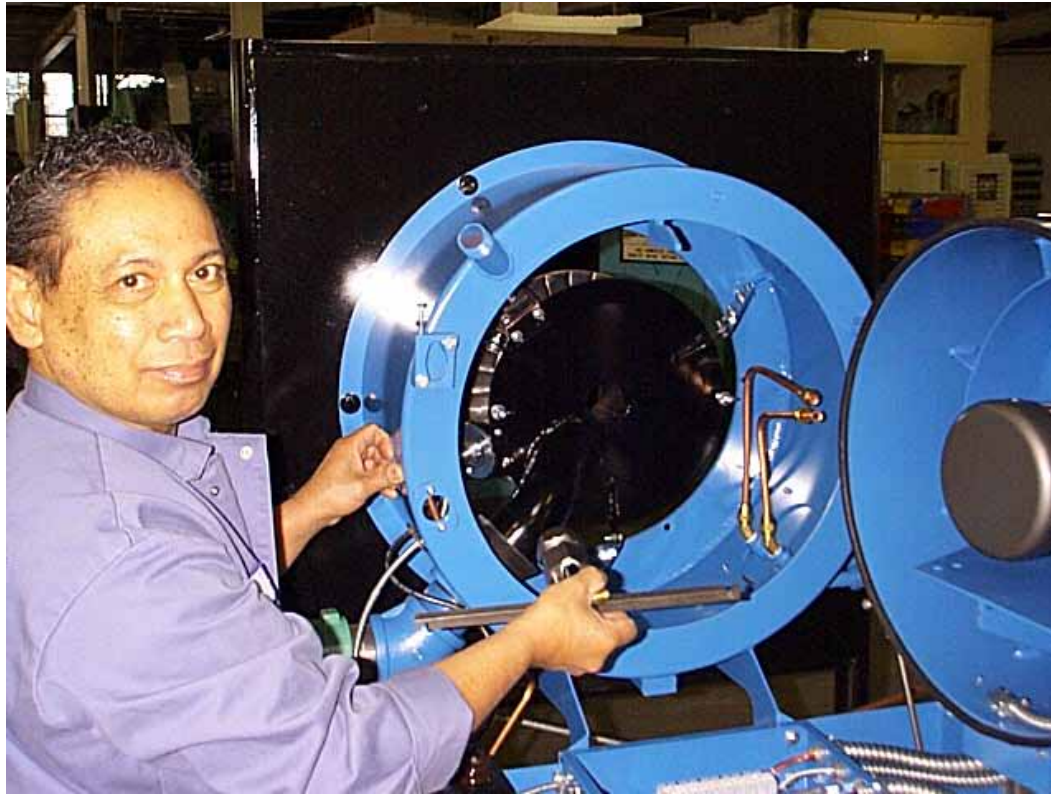

5). Loosen Butterfly Nuts (2)

6). Twist and Retract Support Bar

You're Done! 5 Minutes total.

Re-install nozzle by following steps in reverse order.
